

Deep Reality Viewer | Digital stereo inspection system | 6.1 93x Magnification

The world's first and only digital stereo inspection device, the amazing DRV-Z1 (Deep Reality Viewer), produces full 3D HD visuals that seem to float in front of your eyes.

There are no negative side effects and no need for special goggles or spectacles. Simply take a seat and enjoy crystal-clear, lifelike 3D pictures with exceptional depth awareness.

This incredible idea is completely changing how organizations view, take, and distribute 3D photographs of the samples they are examining.
