

Elitech SVP-7 | Vacuum Pump 2 Stage Intelligent HVAC Refrigerant Recharging | Touch Screen | Data Logging And Storage Via App 110V

The motor and solenoid valve will automatically shut off when the vacuum value that has been programmed is reached. The pump will immediately close the solenoid valve to protect itself from major flaws when it detects an abnormally high working temperature, which could be caused by a motor failure or low oil levels.

Specifications	Details
Power Supply	220V/50Hz or 110V/60Hz
Motor Power	3/4 HP (550 W)
Operating Temperature	5Â°C~ 40Â°C (41Â°F~ 104Â°F)
Gross weight	34.2 lbs / 14.8 kg
