

Kennedy-Pro 5.5x200mm FLAT PARALLEL P RO-TORQ SCREWDRIVER

Chrome vanadium steel blades with magnetic tips. Fitted with a unique dual grip triangular handle which has been designed for improved user comfort, allowing more torque to be applied. With convenient hanging hole in the handle for storage. Parallel Tip To safely drive these screws, the tip of the screwdriver should be of the same width as the slot in the screw head and fill it as well, to minimise slipping and deforming the screw head. DIN ISO 2380.
